EDUCATION

Yale University, New Haven, CT Expected Graduation: May 2029

BS in Computer Science and Economics

Relevant Coursework: Intermediate Microeconomics, Probability and Statistics Intensive, Mathematical Tools for Computer Science, Data Structures and Programming Techniques, Introduction to Engineering, Innovation, and Design,

WORK EXPERIENCE

Arizona Board of Regents, *FAFSA Peer Coach*, Mesa, AZ August 2024 - May 2025

- Increased senior FAFSA completion from 23% to 52%, exceeding the program's 50% goal through targeted outreach, workshops, and individualized student support.
- Coordinated FAFSA workshops, college visits, and career events with representatives from ASU, NAU, GCU, MCC, ERAU, and other institutions, managing logistics, presentations, and student engagement.
- Communicated complex financial-aid information to students, parents, staff, and college representatives through presentations, email, phone, and individualized support, adapting messaging to diverse needs.
- Developed a website and email-based support system to centralize FAFSA resources, address common questions, and connect students with individualized guidance.

LEADERSHIP EXPERIENCE

Yale School of Medicine Courage Lab, *Undergraduate Researcher*, New Haven, CT August 2026 – Present

- Independently developing an eye-tracking software system from research requirements, determining the technical approach for hardware integration, gaze-data collection, and experimental task implementation.
- Designing and implementing an initial task to establish reliable eye-tracking and data-collection capabilities, creating a foundation for future experiments studying anxiety, expectations, and decision-making.
- Translating open-ended cognitive neuroscience research questions into software requirements and iteratively testing the system for reliable experimental use.

Yale ColorStack, *Outreach Chair*, New Haven, CT April 2026 – Present

- Lead external outreach for a 100+ member organization, building relationships with recruiters, employees, researchers, and corporate partners to expand professional development and career opportunities for members.
- Coordinate directly with external partners to schedule company office visits and campus programming, including career panels, technical and academic workshops, and recruiting events featuring professionals from Jane Street, Google, Duolingo, and Y Combinator.
- Conduct targeted cold outreach and manage ongoing partner relationships, coordinating timelines, logistics, and communication across external stakeholders and student leadership to deliver high-engagement events for Yale students across CS, engineering, and other majors.

Yale Bulldogs Racing, *Low Voltage Member*, New Haven, CT August 2025 - Present

- Develop low-voltage systems enabling communication between vehicle components and the driver through a decentralized CAN bus network.
- Integrate modules including the pedal box, dashboard, motor controller, BMS, cooling system, and watchdog into the vehicle's CAN network.
- Helped improve system reliability and debuggability compared to a centralized onboard computer design
- Contributed to dashboard design, including layout, driver information display, and switch selection

SKILLS AND INTERESTS

- *Technical Skills:* C, Python, R, JavaScript, HTML/CSS, Racket, Microsoft Excel, Git/GitHub, CAD, Flask, Pytest
- *Languages:* English, Spanish
- *Interests:* Technology and Education, financial technology, data analytics, technology strategy, social impact
